13b. Authorized Signature: 13d. Name (Typed or Printed): Non-approved design data specified in Block 12. Certifies the items identified above were manufactured in conformity to: Approved design data and are in a condition for safe operation 13c. Approval/Authorization No.: 13c. Date (dd/line User/Installer Responsibilities 14b Authorized Signature: 14a 14d Name (Typed or Printed): and described in Block 12 was accomplished in accordance with Title 14, Code of Federal Regulations, part 43 and in respect to that work, the items are approved for return to service. Certifies that unless otherwise specified in Block 12, the work identified in Block 11 14 CFR 43.9 Return to Service MARK MEENAN M Other regulation specified in Block 12 14e Date (dd/mmm/yyyy): 14c Approval/Certificate No.: 19/MAY/2014 VGOR728L

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block I.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
